Atty. Dkt. No.: WT0115

B. PENDING CLAIMS

1 1. (previously presented) A football comprising:
2 a casing having a laced region; and
3 an outwardly extending lacing coupled to the laced region of the casing,
4 the lacing having an exposed surface, at least a portion of the exposed surface of the
5 lacing having a pebbled texture that is highly grippable when directly contacted by a
6 user's hand, the football being configured for use in competitive play.

٩

- 1 2. (original) The game ball of claim 1, wherein the entire exposed surface of the lacing includes the pebbled texture.
 - 3. (original) The game ball of claim 1, wherein the pebbled texture comprises a plurality of spaced apart pebble-like projections.
- 1 4. (previously presented) The game ball of claim 3, wherein the plurality 2 of projections consist of any combination of at least two shapes selected from the group consisting of irregularly shaped pebble-like projections, hemi-spherically shaped 3 4 projections, generally oval shaped projections, generally triangular shaped projections, generally square shaped projections, generally rectangular shaped projections, generally 5 6 diamond shaped projections, generally pentagon-shaped projections, other polygonal 7 shaped projections, conical projections, frustoconical projections, cylindrical projections, pyramid-shaped projections, and cubic projections. 8
 - 5. (original) The game ball of claim 3, wherein the plurality of projections are arranged in a generally evenly spaced pattern across at least a portion of the exposed surface.
- 6. (original) The game ball of claim 3, wherein the plurality of projections are randomly arranged across at least a portion of the exposed surface.

Atty. Dkt. No.: WT0115

7. (original) The game ball of claim 3, wherein the plurality of projections are generally of equal size.

٠,

ē,

- 8. (original) The game ball of claim 3, wherein the plurality of projections include projections of two or more different sizes.
- 9. (original) The game ball of claim 3, wherein each of the pebble-like projections has a maximum length and a maximum width, and wherein the maximum length and the maximum width define an aspect ratio of within 0.2 and 5.0.
- 1 10. (original) The game ball of claim 9, wherein the aspect ratio is within 2 0.33 and 3.0.
- 11. (original) The game ball of claim 4 wherein the lacing includes at least
 2 one longitudinally extending segment and a plurality of transversely extending
 3 segments, wherein the plurality of projections on the longitudinally extending segment
 4 have a first shape, and wherein the plurality of projections on the transversely
 5 extending segment have a second shape.
- 1 12. (original) The game ball of claim 4, wherein the entire exposed surface 2 of the lacing includes a plurality of pebble-like projections.
- 13. (original) The game ball of claim 4, wherein the lacing further
 comprises an inner substrate and an outer layer, wherein the outer layer includes the
 exposed surface, and wherein the inner substrate is formed from one or more materials
 selected from the group consisting of a woven cloth, a non-woven cloth, a urethane
 impregnated cloth, at least one nylon strand, at least one polyester strand, a metal wire,
 a plastic, a vinyl, a polymer, a latex, a rope, a leather strip and a combination thereof.
- 1 14. (previously presented) The game ball of claim 13 wherein the outer
 2 layer is made of an outer material selected from the group consisting of a wet process
 3 polyurethane, a dry process polyurethane, a coagulated polyurethane, a

- 4 polyvinylchloride foam, a rubber, a polymeric material, an elastomeric material, and a
- 5 combination thereof.

٠,

Claims 15-50 are canceled.

- 51. (previously presented) The game ball of claim 3, wherein the plurality of projections are irregularly shaped pebble-like projections.
- 52. (previously presented) The game ball of claim 3, wherein the plurality of projections are hemi-spherically shaped projections.
- 1 53. (previously presented) The game ball of claim 3, wherein the plurality of projections are generally oval shaped projections.
- 54. (previously presented) The game ball of claim 3, wherein the plurality of projections are generally triangular shaped projections.
- 55. (previously presented) The game ball of claim 3, wherein the plurality of projections are generally square shaped projections.
- 56. (previously presented) The game ball of claim 3, wherein the plurality of projections are generally rectangular shaped projections.
- 57. (previously presented) The game ball of claim 3, wherein the plurality of projections are generally diamond shaped projections.
- 1 58. (previously presented) The game ball of claim 3, wherein the plurality of projections are generally pentagon-shaped projections.
- 1 59. (previously presented) The game ball of claim 3, wherein the plurality of projections are polygonal shaped projections.
- 1 60. (previously presented) The game ball of claim 3, wherein the plurality of projections are conical projections.

- 1 61. (previously presented) The game ball of claim 3, wherein the plurality of projections are frustoconical projections.
- 1 62. (previously presented) The game ball of claim 3, wherein the plurality of projections are cylindrical projections.
- 1 63. (previously presented) The game ball of claim 3, wherein the plurality of projections are pyramid-shaped projections.
- 1 64. (previously presented) The game ball of claim 3, wherein the plurality of projections are cubic projections
